NEW EARTH FARM

Sunflower Planting

Sweet Potato Intercropping

To our partners and friends in the VBCPS System

We invite you and interested classes from Middle or High Schools to join us as we plant roughly 4,000 sunflowers from seed in a 132' by 39' plot in our dedicated learning environment.

Join us for a tour of the farm then spend time volunteering under the supervision of one of our experienced farmhands in the sunflower planting activity.

Later this spring, you may join us again as we intercrop sweet potatoes within the sunflower patch. And what about the harvest? You are welcome to come back in the fall and join us for that, too!

The farm tour will last about 30 minutes. The planting activity should be allocated the same time or longer, depending on your schedule.

Happening Now.

Send us an email to inquire and to schedule your visit: info@cd-international.org
